

ADOBE CONNECT LEGAL VIDEO DEPOSITION POD

CHALLENGE

The legal court reporting industry is increasingly leveraging video conferencing and real-time data feeds so that attorneys can save time and travel costs to attend proceedings remotely. In an effort to deliver a comprehensive live legal video deposition and transcription solution through Adobe Connect, eSyncTraining teamed up with StreamText.net, the leading provider of transcript services, to build the StreamText Legal custom pod. eSyncTraining, who had previously developed the Adobe Connect Closed Captioning Pod, was contacted by StreamText.net to co-develop the pod exclusively for use through Adobe Connect.

With a goal of delivering the newest and most advanced technology to its clients, Veritext, the market leader in court reporting and deposition solutions, signed on as a launch partner for the Adobe Connect pod. The pod will be used to facilitate a fully functional integrated virtual meeting and text-streaming solution for Veritext clients through Adobe Connect's state-of-the-art functionality, leveraging StreamText's real-time text and transcription technology.

SOLUTION

The team at eSyncTraining teamed up with StreamText.Net to set a new standard in streamlined virtual court reporting, integrating with Adobe Connect to create one of the most robust technology platforms for the legal community. The pod seamlessly integrates with Connect's existing video infrastructure and layout structure to optimize live video and transcript integration. eSyncTraining chose a development strategy for the project which combined the Flex 3.5 Framework, Cairngorm MVC Microarchitecture and ActionScript 3.0, designed for Adobe Connect 8 and beyond.

With the StreamText.Net Legal custom pod, clients are able to merge the full feature set of Adobe Connect with the leading transcription services to enable:

- **Live video capabilities** from anywhere, so legal professionals can facilitate legal meetings, interviews and depositions regardless of location
- **Seamless integration ability** with existing video infrastructure platforms like Polycom and Cisco
- **Immediate real-time transcripts** for easy sharing, saving and managing of legal documents whether the deposition is one day or across many months
- **Ability to edit**, bookmark and export recorded depositions

- **Dynamic search functionality** to quickly find a specific phrase or word during the meeting, no matter the length of the transcript
- **User-friendly customization options** allow any user to easily create and read transcripts within the pod
- **Secure environment** gives host users the ability to control what other users can see and do within the pod, allowing clients to have maximum control over an unlimited number of users
- **Reliable hosting environment** on Adobe and StreamText.Net redundancy
- **Archive of the entire deposition** including audio, video, documents and real-time transcript, viewable immediately after the deposition or meeting has ended
- **Ability to upload documents and exhibits** into the deposition meeting room, providing secure access through the entire deposition and case lifecycle
- **Easy comprehensive training** through StreamText Legal custom training modules and courses
- **Full usage reporting** allowing the court reporting firm to see who has accessed sessions and related documents and materials

SUCCESS STORY

With VeriText, the leading court reporting and deposition solutions provider in the United States, the StreamText Legal pod through Adobe Connect found immediate success. VeriText has been a user of Adobe Connect for the past year, with the pod now enabling a whole new range of service and user experience enhancements. As an Adobe Connect user, VeriText has regularly held large multi-location arbitrations and meetings with both audio and video screen sharing across four remote video locations around the country. With the launch of the new pod, VeriText's clients can now benefit from a streamlined user experience with the entire video, screen and searchable transcript available in a single Adobe Connect window.

VeriText incorporated the pod into its first cases in June 2012, with immediate success and positive feedback. VeriText Director of Regional Video Operations, David DaSilva said, "The StreamText Legal pod has helped to revolutionize the way we are able to conduct depositions and arbitrations. This advanced product is launching at

the right time to help move the market forward and we think the adoption curve will be steep among both clients and partners. Our users are excited to streamline and enhance the way the video and transcript is delivered to meeting participants, and at the same time, we are excited to be able to provide them with this product and break new ground for them to improve user experience.” Veritext will feature the pod in a product launch campaign to inform their staff and wide range of clients about the latest Adobe Connect pod and how it can benefit their organizations. Further commenting on early feedback, Peter Florian, Senior Vice President at Veritext noted, “This new platform and our new product, Veritext Virtual, offer great benefit to both the litigation attorney, who can manage their meetings in a single virtual location, and the deposition participants, who are able to watch, track, search and document in a single interface. We are looking forward to rolling this out nationally.”

Leveraging Adobe Connect’s features with the reliability and ease-of-use offered by the StreamText Legal Pod, Veritext gets more than a deposition platform but a technology solution that can also be used to facilitate and document depositions, meetings and arbitrations regardless of geographic boundaries.

VERITEXT

Veritext is the leader in deposition and litigation support solutions. For law firms and corporations, the company provides national coverage, skilled court reporters, advanced technology, and unmatched client service. Our solutions utilize easy-to-use technologies that streamline the deposition process, enhance delivery flexibility, and reliably handle the most complex cases. Proprietary video, mobile and remote services combined with unmatched security, including HIPAA and PII compliance, ensure that Veritext clients have the best tools available and the confidence of working with the market leader.

ESYNCTRaining

eSyncTraining offers a broad spectrum of professional services for their clients’ development needs. Our expert team is experienced in Adobe Flex applications, Adobe Connect custom pods, eLearning courses with a specialized focus on the Flash Platform, Rich Internet and mobile Applications, and can execute on all types of user interface design. They have developed applications and web assets for firms of all sizes, from websites through cutting-edge Flex applications, communication solutions, custom shopping carts, and integrated data visualization and dashboard solutions for some of the world’s leading companies.

STREAMTEXT.NET

StreamText.Net provides real-time streaming text services that are used to deliver accessibility for a wide range of closed captioning users. Founded in 2003, they have grown to be one of the premier primary technology service providers for accessibility and text streaming services. Their services have expanded to include web captioning, conferences, legal proceedings and Adobe Connect Pro meetings.
