

## POWERFUL INTEGRATION BETWEEN ADOBE CONNECT AND YOUR EXISTING SSO SOLUTION

eSyncTraining's Single Sign-On (SSO) service eliminates the need to authenticate your Adobe Connect account through integration with your existing SSO solution. Streamline Adobe Connect workflows with the new HTML 5 mobile experience.

Major systems supported:  
Shibboleth, SAML, LDAP, CAS, Okta

Works with Hosted, On-Premise and Adobe Connect Managed Service deployments

SSO connects your system securely on the back-end allowing users to have a seamless login experience

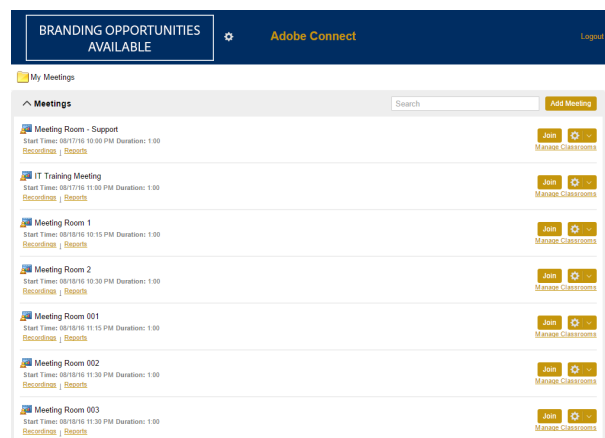

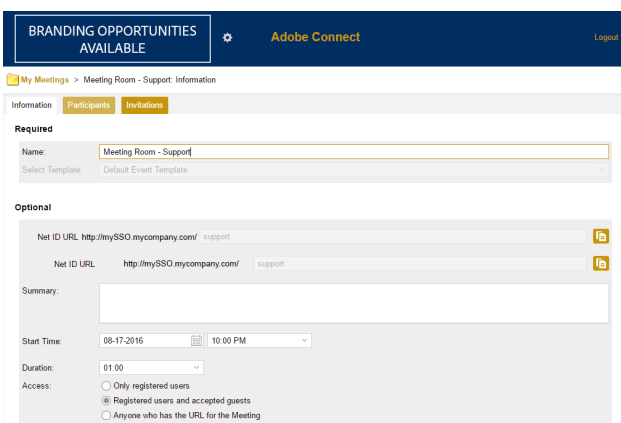

## SIMPLIFY ADOBE CONNECT FOR YOUR ORGANIZATION

Single Sign-On by eSyncTraining is much more than federated authentication. Setting up SSO for Adobe Connect enables you to customize your organization's experience through a simplified user portal which is fully branded and designed for more intuitive meeting setup and sharing.

Utilize the SSO portal to access all objects within Adobe Connect, including building out meeting rooms, invitations, training courses, and events. Craft email invitations and send to designated lists. With the new SSO portal by eSyncTraining, you have the freedom to use your tablet or mobile device for your Adobe Connect needs.

The SSO portal is built in HTML5, enabling the use of Adobe Connect via desktop and mobile devices.

# SINGLE SIGN- ON (SSO)

## USER SYNCHRONIZATION

Sync users from your corporate or institution database with your designated Adobe Connect users, or dynamically provision users on the fly.

## LET YOUR BRANDING DO THE TALKING

Create the portal your organization can be proud of! Take your logo and designated colors and customize the portal to your look, feel, and specifications.

## KEEP YOUR SUB-DOMAIN

Create links that use your internal SSO logic to Adobe Connect. Generate both internal and external links for vCal and event invitations.

## COMPONENTS & ADD-ONS

The sky's the limit when you work with eSyncTraining on your custom integration. Extra components are available for your organization to take your system to the next level. Add meeting and seminar functionality to your account, or opt to include eSyncTraining's fully automated MP4 service with playback on desktop and mobile devices.

Maintain simultaneous Adobe Connect meetings? The Adobe Connect Monitoring tool allows admin to view all active Adobe Connect meetings, with the added ability to chat directly with the host or affected participant directly through an Adobe Connect chat window, or to jump into the Adobe Connect room for instant support.

## CUSTOMIZATION PROCESS - TAILORING TO YOUR NEEDS

No two organizational SSO needs are the same. We will work with you and your team to achieve full single sign-on fluidity between your existing SSO solution and Adobe Connect. We have several customizations prefabricated that can act as the base product to improve any of your workflows for meetings, virtual classrooms, seminars, and internal/external users.
